PROFESSIONAL SUMMARY

DevOps and Automation Engineer with 4.9 years of experience automating, scaling, and securing enterprise hybrid cloud and Linux infrastructure across Azure and AWS environments. Proven track record of replacing manual infrastructure with robust, scalable Infrastructure as Code (IaC) and automated GitOps workflows. Expert in modern containerization, system hardening, rapid provisioning, and proactive production observability.

TECHNICAL SKILLS

- **Cloud & Hybrid:** Azure (VMs, Azure Monitor, Azure Stack HCI), AWS (EC2, S3, IAM, CloudWatch)
- **Containers & GitOps:** Docker, Kubernetes (K8s), Helm, ArgoCD
- **Infrastructure as Code (IaC):** Terraform, Ansible
- **CI/CD & Version Control:** Azure Pipelines, Jenkins, GitLab CI/CD, Git, GitHub, Artifactory
- **Monitoring & Observability:** Prometheus, Grafana, Datadog, Azure Monitor, AWS CloudWatch
- **OS & Scripting:** Red Hat Enterprise Linux (RHEL), Ubuntu, Shell Scripting (Bash), Python Development, MySQL

PROFESSIONAL EXPERIENCE

Quess Corp (Contracted to Reliance Jio) | Mumbai, MH (Remote/Hybrid)

DevOps and Automation Engineer | March 2024 – Present

- **Containerization & GitOps:** Orchestrated highly available container workloads using Kubernetes and OpenShift; streamlined active production pipelines by integrating validation gates into Git-based Azure DevOps workflows.
- **Automation & Hardening:** Engineered and executed Python- and Bash-based system hardening scripts across 200+ RHEL/Ubuntu nodes, ensuring 100% compliance with CIS Benchmarks and cutting audit prep overhead by 80%.

- **Proactive Monitoring:** Eliminated reactive operations by deploying Prometheus and Grafana dashboards alongside Azure Monitor, dropping the Mean Time to Detection (MTTD) of critical server and node faults by 45%.
- **Infrastructure Orchestration:** Utilized Ansible and modular automation workflows to provision and maintain consistent hybrid cluster environments, reducing baseline deployment times to under 30 minutes.

HotelKey | Nagpur, MH

Product Analyst (Cloud Operations) | July 2023 – February 2024

- **Python Automation:** Architected a comprehensive suite of custom Python and Bash monitoring scripts that automated routine log analysis and operational dashboard metrics, saving 10+ hours of manual troubleshooting weekly.
- **Cloud Engineering:** Managed and scaled core AWS infrastructure (EC2, S3), optimizing resource allocation and compute workloads to systematically reduce monthly cloud spend by 18%.
- **Infrastructure Monitoring:** Engineered targeted AWS CloudWatch metrics and alerts to track node health, memory utilization, and active process uptimes, ensuring maximum application performance.
- **Cloud Security Engineering:** Standardized AWS IAM access control profiles and security groups across multi-tier environments, successfully eliminating over-privileged accounts through strict least-privilege enforcement.

UniSoft Technologies | Nagpur, MH

Linux & SQL Technical Trainer | June 2021 – June 2023

- **Infrastructure Management:** Maintained, patched, and secured internal Linux training infrastructure, keeping 99.9% environment uptime while guiding 500+ professionals through production systems administration.
- **Curriculum Development:** Developed an end-to-end sandbox curriculum detailing Linux Troubleshooting, Shell Scripting, and AWS cloud fundamentals, accelerating student practical lab completion speeds by 35%.
- **Database Administration:** Optimized and managed local Oracle and MySQL database environments, implementing automated recovery scripts that completely eliminated manual configuration overhead.

KEY PROJECTS

Automated CIS Compliance Checker | *Python, Bash, Linux Security*

- Built a lightweight scanning framework that audits OS internals against CIS baselines and reports real-time scores via HTML, reducing manual audit operational overhead to zero and eliminating configuration drift.

Hybrid Cloud Automation Platform | *Terraform, Kubernetes, GitOps*

- Developed reusable Terraform core modules to anchor hybrid connections (VPCs, Subnets, Azure VNets) integrating On-prem, Azure Stack HCI, and Google Cloud environments, standardizing zero-friction workload cross-delivery.

CERTIFICATIONS

- **Red Hat Certified Engineer (RHCE)** | Red Hat
- **Red Hat Certified System Administrator (RHCSA)** | Red Hat
- **Fundamental of Ansible** | Red Hat
- **Oracle Database 12c Administration Certified Associate** | Oracle

EDUCATION

- **Bachelor of Technology (B.Tech) in Information Technology** (2017 – 2021)
Dr. Babasaheb Ambedkar Technological University, Lonere | *CGPA: 8.4 / 10*
